

# OSINT Cheat-Sheet

Investigative Resources - Summer 2019

INTELTECHNIQUES  
.com

Methodology | Preparation | Execution | Documentation

## Pre-Operational Considerations

Ethical and Legal Assessment

Deliverables and Scope

Time and Resource Constraints

Exposure/Risk Factors

Adversary Sophistication

Communication and Sit-reps

Control Expectations

## Workspace & Tools

Clean/Secure Workstation

Clean/Secure Connectivity

Fresh Research Accounts

Clean Browser w/Extensions

Collection Tools

Documentation System

Storage/Archiving Solution

## Investigative Steps

Knoll Your Tools

Define The Question

Document Your "Knowns"

Set Up Collection

Query, Sweep, and Pivot

Consolidate Findings

Complete Reporting and Archive

## OSINT Resources

[OSINTFramework.com](https://osintframework.com)

[OSINTBrowser.com](https://osintbrowser.com)

[Netbootcamp.org](https://netbootcamp.org)

[Workinukraine.space](https://workinukraine.space)

Create Link Charts - Organized Crime & Corruption Project

<https://gephi.org/>  
<http://www.automatingosint.com/blog/category/gephi/>

<https://www.xmind.net/>  
Mind Mapping - Free and Paid Versions

<https://medium.com/@raebaker/using-lampyre-for-basic-email-and-phone-number-osint-e0e36c710880> (Lampyre)

<http://www.visualsitemapper.com/>  
Domain Mapping

<https://www.draw.io/>  
<https://github.com/michenriksen/drawio-threatmodeling>

<https://github.com/woj-ciech/Danger-zone>  
Link IPs, Domains, and Email Addresses

<https://www.mindmup.com/>  
Mind Mapping - Free and Paid Tiers

<https://www.nodexlgraphgallery.org/Pages/Registration.aspx>  
Powerful Graphing Client - Free and Paid Tiers

## Useful Browser Extensions

<https://www.onenote.com/clipper>  
Screen Capture and Tag (One-Note Users Only)

<https://getfireshot.com/>  
Screen Capture and Annotation (as image or pdf)

<https://github.com/ssborbis/ContextSearch-web-ext>  
Context Menu Search Menu

<http://www.osintbrowser.com/>  
OSINT Bookmarks

<https://github.com/az0/linkgopher/>  
Simple Link Extraction

<https://github.com/marklieberman/downloadstar>  
Firefox - Download all items in a webpage that match a pattern

<https://github.com/mozilla/multi-account-containers#readme>  
Firefox - Multi-Account Containers (Compartmentalization)

<https://github.com/mozilla/multi-account-containers#readme>  
Firefox - Multi-Account Containers (Compartmentalization)

<https://webrobots.io/>  
Scrape YP, Yelp, Ebay, Amazon, etc. Save as Excel or CSV

## My Workstation Setup

**Workstation** - Win 10, PIA/ProtonVPN, Chrome/Firefox, Vbox, Buscador/Kali, Nox/Geny, Hunch.ly, UC Cable/Mifi, Keypass, Malwarebytes, Glasswire

**Mobile** - iPhone, MySudo, Signal, Wire  
- Android, burner, unlocked, on Mint sim kit

**Email/Payments** - Prontonmail, GMX, Fastmail, Blur, 33mail, Privacy.com, Vanilla Visa

**Office Software** - Libre, OneNote, Notepad++, CherryTree, Standard Notes, Paper notebook, Teams/Slack/Mattermost/Rocket

**Alt-Hardware:** MacBook Air, Atom Text Editor, VMware Fusion, Chrome/Firefox, Little Snitch

**Hypervisors:** Virtualbox, Buscador Linux, Kali Linux, Genymotion, Nox

## Google Operators

Remember we can string multiple operators together

site:	Limit results to those from a specific domain <a href="#">site:apple.com</a>
" "	Quotes indicate search for exact term <a href="#">"red rider BB gun"</a>
AND	Only show results for both terms <a href="#">apple AND orange</a>
OR	Search for term A, term B, or both. A pipe symbol is the same as OR. <a href="#">gun OR rifle</a> is the same as <a href="#">gun   rifle</a>
*	Wildcard for words in a phrase that you don't know <a href="#">wish * a star</a>
( )	Group a set of words/operators separately <a href="#">(gun   pistol) ammo</a>
-	Exclude results including this word <a href="#">chicago baseball -cubs</a>
\$	Search for a certain price <a href="#">"apple watch" \$299</a>
cache:	Most recent cached version of a domain <a href="#">cache:boston.gov</a>
filetype:	Only search for specific filetype, ext: works the same <a href="#">filetype:pdf "confidential"</a> or <a href="#">ext:pdf "confidential"</a>
related:	Search for sites related to a domain <a href="#">related:sony.com</a>
intitle:	Find pages with a term in the page title <a href="#">intitle:sabotage</a>
inurl:	Find pages with a term in the url <a href="#">inurl:private</a>
around(x)	Find pages with terms in X words proximity of each other <a href="#">microsoft (7) surface</a>
info:	Sometimes shows related pages, cache date etc. <a href="#">info:chicago.gov</a>
Adv. Search	<a href="https://www.google.com/advanced_search">https://www.google.com/advanced_search</a>

More Operators: <https://ahrefs.com/blog/google-advanced-search-operators/>

## DuckDuckGo

DuckDuckGo handles some operators a little differently

Cats dogs	Results about cats or dogs
"cats and dogs"	Results for exact term "cats and dogs". If no results are found, we'll try to show related results.
cats +dogs	More dogs in results
cats filetype:pdf	PDFs about cats. Supported file types: pdf, doc(x), xls(x), ppt(x), html
dogs site:example.com	Pages about dogs from example.com
Cats -site:example.com	Pages about cats, excluding example.com
intitle:dogs	Page title includes the word "dogs"
inurl:cats	Page url includes the word "cats"

## Startpage

Startpage makes Google requests on your behalf (privacy)

Operators	Most standard Google operators work
Adv. Search	<a href="https://www.startpage.com/en/advanced-search.html">https://www.startpage.com/en/advanced-search.html</a>
Search Tips	<a href="https://support.startpage.com/index.php?/Knowledgebase/List/Index/1">https://support.startpage.com/index.php?/Knowledgebase/List/Index/1</a>

## Bing Operators

Most of the Google operators work in Bing

( )	Just like Google, terms or operators grouped in parenthesis are processed together and separate from other conditions
OR	All Bing searches are treated as AND searches unless you specify OR between terms <a href="#">goat OR pig OR cow</a>
NOT	Exclude results with a specific term(s) the - symbol also works <a href="#">boat NOT (raft OR ship)</a>
loc:	Return pages from a specific region(s) <a href="#">dogs (loc:GB OR loc:FR)</a>
prefer:	Weight results in favor of a term <a href="#">prefer:tomato plum apple</a>
near:x	Words in x proximity of each other <a href="#">red near:4 blue</a>
ip	Finds sites hosted on an IP address <a href="#">ip:208.43.115.82</a>
site/domain:	Filter for specific domain type <a href="#">site/.gov confidential</a>
feed:	Finds RSS feeds based on search terms <a href="#">feed:osint</a>
Bing Adv.	MS retired Bing's advanced search page

[info:https://www.lifewire.com/bing-advanced-search-3482817](https://www.lifewire.com/bing-advanced-search-3482817)

## Yandex

Most standard Boolean operators work (Google operators) such as site: and "quotes"

Adv. Search	Click the  icon in the search bar
lang:	Language filter <a href="#">ccn lang:fr</a>
mime:	Similar to filetype <a href="#">mime:docx gdpr</a>
date:	Page modified date <a href="#">bombing date:20180416</a>
url:	Similar to site: but adding a * to the end of the url pulls up any docs sharing that url <a href="#">url: Alice url:en.wikiquote.org/wiki/*</a>

SPECIAL OPERATORS: <https://yandex.com/support/direct/keywords/symbols-and-operators.html>

## Baidu

Most standard Google Operators work on Baidu

Adv. Search	<a href="https://www.baidu.com/gaoji/advanced.html">https://www.baidu.com/gaoji/advanced.html</a>
In English	<a href="http://www.baiduinenglish.com/">http://www.baiduinenglish.com/</a>
Search Tips	<a href="https://www.seomandarin.com/baidu-search-tips.html">https://www.seomandarin.com/baidu-search-tips.html</a>

## Other International

Consider using a proxy or VPN to appear in the target region

Adv. Search	<a href="https://www.alexa.com/topsites/countries">https://www.alexa.com/topsites/countries</a>
Colossus	<a href="http://www.searchenginecolossus.com/">http://www.searchenginecolossus.com/</a>
Occrp	<a href="https://data.occrap.org/">https://data.occrap.org/</a>
Int. OSINT	<a href="https://start.me/p/W2kwBd/sources-cnty">https://start.me/p/W2kwBd/sources-cnty</a>
UK	<a href="https://investigativedashboard.org/databases/">https://investigativedashboard.org/databases/</a>

## Speed Tricks

Saving a few seconds here and there adds up over time

Context Search	<a href="https://github.com/ssborbis/ContextSearch-web-ext">https://github.com/ssborbis/ContextSearch-web-ext</a>
Add As Search Engine	<a href="https://www.wired.com/2014/07/tip-week-chrome-site-search/">https://www.wired.com/2014/07/tip-week-chrome-site-search/</a>
Default to Last Year	<a href="https://thepracticalsysadmin.com/defaulting-google-search-results-to-the-past-year/">https://thepracticalsysadmin.com/defaulting-google-search-results-to-the-past-year/</a>
Keyboard Shortcuts	<a href="https://www.quinnssmtbrand.com/windows-key-board-shortcut/">https://www.quinnssmtbrand.com/windows-key-board-shortcut/</a>

## Virtual Machines

Follow written steps verbatim when installing VMs

Buscador	<a href="https://inteltechniques.com/buscador/">https://inteltechniques.com/buscador/</a>
Virtualbox	<a href="https://www.virtualbox.org/wiki/Downloads">https://www.virtualbox.org/wiki/Downloads</a>
VBox Extensions	<a href="https://download.virtualbox.org/virtualbox/6.0.10/Oracle_VM_VirtualBox_Extension_Pack-6.0.10.vbox-extpack">https://download.virtualbox.org/virtualbox/6.0.10/Oracle_VM_VirtualBox_Extension_Pack-6.0.10.vbox-extpack</a>
Kali Linux	<a href="https://www.kali.org/downloads/">https://www.kali.org/downloads/</a>
Tails	<a href="https://tails.boum.org/">https://tails.boum.org/</a>
Update Linux	apt-get update && apt-get upgrade
Update You-tube-DL	sudo -H pip install --upgrade youtube-dl
Common Error	Make sure virtualization is enabled in BIOS settings
Host Key	Win - Right Control Key Mac - Left Command Key
Vbox Scale Issues	host + f, to switch to full screen mode, if not yet, host + c, to switch to/out of scaled mode, host + f, to switch back normal size, if need
3rd Party Over-view	<a href="https://www.youtube.com/watch?v=7Y_fKC5EN10">https://www.youtube.com/watch?v=7Y_fKC5EN10</a>

INTELTECHNIQUES.com

## Common Missteps

Methodology is more important than tools or techniques because those things change. Invest in defining strong process.

Failure to use non-OSINT approaches and strategies ie: social engineering (consider a friendly phone call)

Are you signed into a live session for the platform you are querying? ie: make sure you are signed into FB in another tab

Including a space at the end when pasting a account ID or other keyword into a query form field.

Do you have script blockers that might be preventing data from loading on a page? (ie: privacy badger, ublock, ghostery)

Location. Your search results are being skewed by your perceived location, consider using VPN to "relocate".

Start looking at page source to see what is going on behind the scenes. If you only look at the gui, you are missing alot.

**Tenacity** wins the day. Most answers are not going to fall into your lap. **Patience** and **persistence** above all else.

# OSINT METHODOLOGY 101

BUILDING AN EFFICIENT, REPEATABLE, AND ARTICULABLE PROCESS

## Basic Investigative Steps

Working up your first case with your new tools and techniques

1. Set up your note-taking and data collection to track your work - paper notebook, One-Note, Hunch.ly, directory on encrypted flash drive, etc.
2. List your investigative goals - full profile, locate for apprehension, identify associates, collect digital evidence, etc. (are you collecting intel or evidence for court?)
3. List your seed info - emails, phone numbers, names, etc.
4. Run all of your paid and/or gov queries and use those to add to your seed information. If possible get a hold of a booking or DOL photo for comparison while researching social media.
5. Run Accurant (Lexis-Nexis), TLO, or Clear reports.
6. Fire up firefox/chrome with your plugins of choice - noscript, https everywhere, ghostery, fireshot, one-tab (or use browsers in Buscador VM)
7. If it's a serious investigation I turn on hunch.ly and enter my "selectors" (keywords from seed info)
8. I do a quick Google search and check my people finder site of choice for that week. ["James McIntire" "Denver"] and then this week truepeoplesearch.com These are just quick for low hanging fruit.
9. Go to <https://inteltechniques.com/menu.html> (or your OSINT toolset of choice ie: [osintframework.com](https://osintframework.com)) and use the tabs on the left hand side to select the categories that match your seed info. My typical order is email, real name, search engines, Facebook, twitter and then the rest depending on what you have to go on.
10. I exhaust inteltechniques.com tools closing any tabs that return false positives or no useful results. Any page that is important I note any identifiers (account IDs, user names, etc) on my notepad and fireshot a pdf of the page. That pdf is saved in the case directory. On a case with multiple targets create subfolders for each person of interest.
11. Either periodically or when I'm done with my research I copy/paste or manually enter any pertinent info into a profile or case report in either word or one-note. I embed any pertinent screen captures, pdfs such as lexis-nexis reports, and good photos of the targets, any vehicles and addresses.
12. I go over that report with the case detective or agent to explain my investigation and see if they have any questions or want any additional info.
13. My rough notes, workbooks, hunch.ly files, and/or cloned VMs (if I used buscador) are usually saved in case I need them for court. The exceptions are things like intel gathering for operations, events, threat assessments, etc. A hunch.ly export might be burned to disc as evidence but be cautious of any unintended data that might have been unintentionally saved during that session. The VM backup should not go into evidence as it would divulge trade-craft. Treat it as an undercover laptop that you can refer to, but avoid exposing it unless you are forced to (work with your prosecutor to fight this). If you don't need that VM for court, do not keep it (hoarding data comes with custodial responsibilities and potential liabilities).
14. I make sure I have a fresh VM for the next case or crisis that comes up. I also make new accounts to have in pocket if any of my research accounts were burned. Better to prepare for the next case at the end of the previous and be ready to go at a moments notice
15. Wash, rinse, repeat. Track successes to justify more equipment, staffing, and training.

Note: My standard setup is an off-grid windows pc, on a UC cable modem or mifi (VPN as appropriate).

For quick checks such as events, threats, etc. I stay in windows and just use chrome/Firefox and the links on inteltechniques.com. This is for convenience and speed with less fuss when there's less of a need for compartmentalization, security, and/or anonymity. For investigations I typically use Buscador with Hunch.ly installed, and all fresh research account. Quick utility vs. backstopped single purpose - use the right tool for each mission.

## Building Reliable Research Accounts

This is a list of recommended steps for creating investigative/research social media accounts. These are largely based on feedback from our community and their experiences with having their accounts locked or suspended. Where applicable steps are in order of preference in regards to successfully avoiding security challenges.

**Equipment Setup** – It may seem simple, but the equipment and connection you are on matters.

1. Avoid VPNs during account creation, most of their IP ranges are flagged
2. Mifi's or dynamic IP devices work quite well for account creation
3. Public networks (Starbucks Wi-Fi) but be aware that you are being exposed and cross-correlated with other users on that network
4. Phone #- A real non-VOIP phone number will save you a lot of hassle, we recommend a \$5 Mint sim card kit paired with an unlocked smart phone (mintmobile.com)
5. Online Footprint – "Google" your name and employer. Print the first two pages of results and include this in your binder as the "low hanging fruit" of personal data.

### **Covert Accounts**

1. We usually make FB, IG, and Twitter at once and tie them in as one covert profile. Each adds depth and veracity to the others (intentional cross correlation).
2. Keep notes on your covert details either in a paper notebook or a digital format like a password manager or spread sheet, having your security requirements in mind.
3. If it is a sensitive or deep infiltration case make sure to compartmentalize this profile from the get-go (connection, browser, device (use VM to isolate), etc.)
4. Connection:
  - a. no VPN during account creation, most VPN IP blocks are flagged
  - b. Cellular data connections (MiFi's) are good – dynamic/shared IPs
  - c. Another technique is to get a free tier AWS EC2 or Digital Ocean VM and use it to make the account as then you will have an AWS IP, this is more advanced but works pretty well if you are comfortable with VMs and learning to navigate AWS. Some groups even run full investigative VMs on AWS, but again this is a more advanced setup that takes some work to sort out.
  - d. Another advanced technique is to roll your own VPN thru AWS as the providers tend not to flag AWS  
<https://github.com/StreisandEffect/streisand>
5. Email Address:
  - a. no Gmail, Hotmail, yahoo, or other top free mail (Gmx is an exception for now)
  - b. Private domains work best, grab a Namecheap or GoDaddy domain and webmail for cheap and make a bunch of account with them
  - c. Gmx.us accounts seem to work ok (for now) and require no existing email or contact info
  - d. Sudomail and Protonmail addresses work ok, not as good as a private domain though
6. Phone #:
  - a. You might get lucky and not get the phone number requirement, but also sometimes it won't require it at first but then a couple hours or days in it will throw it at you as a security requirement
  - b. No VOIP – most number blocks are flagged
  - c. Mint test kits and an unlocked phone are a cheap way to get 7 days on a real number
    1. Make sure you have Mint coverage in your area
    2. <https://www.amazon.com/Mint-Mobile-Starter-Verify-Compatibility/dp/B0786RD524> (\$5 for two sims)
    3. You might then port the number over to google voice
    4. Some groups buy these in bulk
  - d. You can also use an extra # on a real account (i.e.: Verizon) and then port it over to google voice and then draw a new # for that Verizon account
  - e. Some people will also use hotel phones and the like when traveling to roll accounts, but that is kind of

# ACCOUNT CREATION (CONT.)

## BUILDING AN EFFICIENT, REPEATABLE, AND ARTICULABLE PROCESS

7. Once we get into our new account, we do not leave it fallow, start making it feel real right away
8. Choose a name that is generic, but not too generic
  - a. i.e.: Nicky Robinson, Hunter Reynolds, etc.
  - b. <http://howmanyofme.com/>
9. Name, gender, city, employer (school) should make sense, remember a real person at FB will likely look at your profile if it is reported as suspicious, we want to pass the smell test
10. Profile/cover photo
  - a. We don't ever purport to be a specific individual without consent (i.e.: no identity theft)
  - b. Pikwizard.com – Good source for free for anything licensed photos
  - c. Pixabay.com is also decent
  - d. Avatar makers are another option <https://mashable.com/2007/09/12/avatars/#mn3Ph1PwgZqi>
  - e. fiverr.com – You can buy profile photos for cheap or anything else really...avoid buying bulk accounts, they are often locked, scams, or stolen
  - f. I also like taking a pic from images.bing.com of a large crowd (road race, sporting event, concert), use the snip tool to crop it, and then post the still large group shot, it's unclear who we are in the group and yet it's the kind of content people post for profiles or banners because the internet is all about bragging
  - g. Get creative – general rule is snip, crop, filter, logical pic choice
1. Time to flesh out our profile by making some friends
  - a. Join Groups – anything that has large groups that accept anyone
  - b. Nerdy groups and pop culture are my favs: video games, cosplay (cause then costumed profiles make sense), etc.
  - c. If you are doing a deep infiltration you may have to research your targets groups, don't join her/his groups directly, join similar and work your way in slowly after you have some history
  - d. Do some liking and commenting in groups for a day or two
  - e. then <https://www.facebook.com/find-friends/browser/> and let FB recommend friends. We never cold call friends anymore, we let FB tell who it's already cross correlated with our profile. This reduces chances of getting flagged significantly.
2. Posts: August 1st Facebook cut off all 3rd part app access except for messenger or FB pages. We formerly used IFTTT and WordPress to auto-post but they are broken for now. IFTTT still works for twitter.
3. Avoid political chat and comments. Politics and social issues are high on the radar of the FB watchdogs due to the fake news and voter tampering concerns.
4. Keep track of covert accounts in a spread sheet or better yet a password manager.
5. Sim jacking Twitter accounts is very popular so use long passphrases even on your sock accounts and consider 2-factor if they are mature or otherwise valuable accounts
6. Know your agencies policies around things like friending and any levels of approval or documentation required
7. ...and of course, we always use our powers for good so we always assume that our investigation will eventually see the light of day so make sure you are proud of how your activity will look in retrospect by an objective 3rd party in regard to reasonable and responsible

**Note:** This is purely anecdotal, but in addition to “getting into character” and making our accounts feel real, I suspect that there may be some value to occasionally clicking on ads and other content that the platform is pushing at you. This is not a privacy/security best practice, but there are detection algorithms that may favor revenue positive accounts. Again, this is just a theory.

# SHORTCUTS & HOT-KEYS

COMPLETING 1,000 SMALL TASKS A LITTLE FASTER

Chrome	
Shortcut Keys	Description
Alt+Home	Open your homepage.
Alt+Left Arrow	Back a page.
Alt+Right Arrow	Forward a page.
F11	Display the current website in full-screen mode. Pressing F11 again will exit this mode.
Esc	Stop loading the page or a download from loading.
Ctrl+(- or +)	Zoom in or out of a page, "-" will zoom out and "+" will zoom in on the page.
Ctrl+1-8	Pressing Ctrl and any number 1 through 8 moves to the corresponding tab in your tab bar.
Ctrl+9	Switch to last tab.
Ctrl+0	Reset browser zoom to default.
Ctrl+Enter	This combination is used to quickly complete an address. For example, type "computerhope" in the address bar and press Ctrl+Enter to get <a href="https://www.computerhope.com">https://www.computerhope.com</a> .
Ctrl+Shift+Del	Open the Clear browsing data window to quickly clear private data.
Ctrl+Shift+B	Toggle the bookmarks bar between hidden and shown.
Ctrl+A	Select everything on a page.
Ctrl+D	Add a bookmark for the page currently opened.
Ctrl+F	Open the "find" bar to search text on the current page.
Ctrl+O	Open a file in the browser.
Ctrl+Shift+O	Open the Bookmark manager.
Ctrl+H	Open browser history in a new tab.
Ctrl+J	Display the downloads window.
Ctrl+K or Ctrl+E	Moves your text cursor to the omnibox so that you can begin typing your search query and perform a Google search.
Ctrl+L	Move the cursor to the browser address bar and highlight everything in it.
Ctrl+N	Open New browser window.
Ctrl+Shift+N	Open a new window in incognito (private) mode.
Ctrl+P	Print current page or frame.
Ctrl+R or F5	Refresh the current page or frame.
Ctrl+S	Opens the Save As window to save the current page.
Ctrl+T	Opens a new tab.
Ctrl+U	View a web page's source code.
Ctrl+W	Closes the currently selected tab.
Ctrl+Shift+W	Closes the currently selected window.
Ctrl+Shift+T	This combination reopens the last tab you've closed. If you've closed multiple tabs, you can press this shortcut key multiple times to restore each of the closed tabs.
Ctrl+Tab	Moves through each of the open tabs going to the right.
Ctrl+Shift+Tab	Moves through each of the open tabs going to the left.
Ctrl+Left-click	Open a link in a new tab in the background.
Ctrl+Shift Left-click	Open a link in a new tab and switch to the new tab.
Ctrl+Page Down	Open the browser tab to the right.
Ctrl+Page Up	Open the browser tab to the left.
Spacebar	Moves down a page at a time.
Shift+Spacebar	Moves up a page at a time.
Home	Go to top of page.
End	Go to bottom of page.
Alt+Down Arrow	Display all previous text entered in a text box and available options on a drop-down menu.

\*Shortcut List Source: [www.computerhope.com](https://www.computerhope.com)

# SHORTCUTS & HOT-KEYS

COMPLETING 1,000 SMALL TASKS A LITTLE FASTER

Firefox	
Shortcut Keys	Description
F5	Refresh current page, frame, or tab.
F11	Display the current website in fullscreen mode. Pressing F11 again will exit this mode.
Esc	Stop page or download from loading.
Spacebar	Moves down a page at a time.
Alt+Home	Open your homepage.
Alt+Down arrow	Display all previous text entered in a text box and available options on drop-down menu.
Alt+Left Arrow	Back a page.
Alt+Right Arrow	Forward a page.
Ctrl+(- or +)	Increase or decrease the font size, pressing '-' will decrease and '+' will increase. Ctrl+0 will reset back to default.
Ctrl+D	Add a bookmark for the page currently opened.
Ctrl+F	Access the Find option, to search for any text on the currently open web page.
Ctrl+H	View browsing history.
Ctrl+I	Display available bookmarks.
Ctrl+J	Display the download window.
Ctrl+K or Ctrl+E	Move the cursor to the search box.
Ctrl+L	Move cursor to address box.
Ctrl+N	Open New browser window.
Ctrl+O	Access the Open File window to open a file in Firefox.
Ctrl+P	Print current page or frame.
Ctrl+T	Opens a new tab.
Ctrl+U	View a web page's source code.
Ctrl+F4 or Ctrl+W	Closes the currently selected tab.
Ctrl+F5	Refresh the page, ignoring the Internet cache (force full refresh).
Ctrl+Enter	Quickly complete an address.
Ctrl+Tab	Moves through each of the open tabs.
Ctrl+Shift+Del	Open the Clear Data window to quickly clear private data.
Ctrl+Shift+B	Open the Bookmarks window, to view all bookmarks in Firefox.
Ctrl+Shift+J	Open the Browser Console to troubleshoot an unresponsive script error.
Ctrl+Shift+P	Open a new Private Browsing window.
Ctrl+Shift+T	Undo the close of a window.
Ctrl+Shift+W	Close the Firefox browser window.
Shift+Spacebar	Moves up a page at a time.
Ctrl+Shift+Tab	Moves through each of the open tabs going to the left.
Ctrl+Left-click	Open a link in a new tab in the background.
Ctrl+Shift Left-click	Open a link in a new tab and switch to the new tab.
Ctrl+Page Down	Open the browser tab to the right.
Ctrl+Page Up	Open the browser tab to the left.
Spacebar	Moves down a page at a time.
Shift+Spacebar	Moves up a page at a time.
Home	Go to top of page.
End	Go to bottom of page.
Alt+Down Arrow	Display all previous text entered in a text box and available options on a drop-down menu.

\*Shortcut List Source: [www.computerhope.com](http://www.computerhope.com)

# BUSCADOR 2.0

OSINT LINUX DISTRO

## Installation Notes (2.0)

You will need a Virtual Machine application in order to use this system. VirtualBox is free and will suffice for most investigations. Some users prefer a more robust option with VMWare Workstation for Windows or VMWare Fusion for Mac. Any of these options will get you started.

VirtualBox Installation and Configuration:

\* Make sure you have latest version of VirtualBox and VirtualBox Extension Pack installed

- 1) In the VirtualBox menu, click on File > Import Appliance
- 2) Navigate to the OVA file that was downloaded (Buscador)
- 3) Choose this file and select "Import"
- 4) Before starting the new machine, highlight it and choose "Settings"
- 5) Under General > Basic, rename this machine as desired (Buscador?)
- 6) Under General > Advanced, change Shared Clipboard to Bi-Directional
- 7) Under System > Motherboard, increase the RAM if you have ample resources (half of total system)
- 8) Under Display > Screen, increase the Video Memory to 128MB if available
- 9) Under Shared Folders, click the "plus" on the right, choose folder to store evidence, select "Auto-Mount"
- 10) Click "OK" twice, then launch the new machine (Double Click)
- 11) Upon boot, log into the user "osint" with the password of osint
- 12) In the VirtualBox Menu, select Devices > "Insert Guest Additions CD Image"
- 13) Click "Cancel" when the dialogue box pops up.
- 14) Open Terminal (Tilix)
- 15) In Terminal, Create a directory on the Desktop titled vbox: `mkdir ~/Desktop/vbox`
- 16) Copy everything from the CD media on the Desktop to vbox folder (copy/paste)
- 17) In Terminal, input the following commands:

```
cd Desktop/vbox
chmod +x *.sh
./autorun.sh
(type password when prompted)
```

- 18) Allow the image to be installed, and reboot upon completion.
- 19) Start the Terminal in the new VM and type `sudo adduser osint vboxsf`
- 20) Provide the password as needed (osint)
- 21) Reboot

You should now have access to the shared directory in order to save data to the host operating system (evidence). It can be found in the File Manager (Home), on the left column, titled "sf\_" followed by the name of the folder to which it is connected. This shared folder will also be on your desktop for easy access. You can make the machine full-screen, copy and paste text to and from the image, and you are ready to begin using the applications.

## Support & Updates

Open Tilix (Terminal), and enter the following commands:

*NOTE:*

*Update\_scripts no longer needed!*

Video Download Update:

```
sudo -H pip install --upgrade youtube-dl
```

Spiderfoot Update:

```
cd /opt/spiderfoot
git reset --hard
git pull
sudo reboot
```
